

Prep Master® Planetary Machine

3-Head Planetary Machine

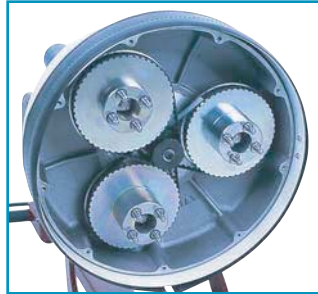

This multi-purpose machine is designed for surfacing concrete floors, restoring or preparing wood decks and hardwood floors. Unique changeable heads are easy to install and remove, adding to the machine's versatility.

The counter-rotating head makes this machine easy to operate and control with no sliding.

Flexible startup trigger allows the operator to activate the machine with a gentle squeeze.

Heavy duty switch is set in a steel switch box with 15 AMP circuit breaker

The handle and frame are constructed of heavy-duty steel for strength and durability.

Unique belt drive 3-head system is designed for smooth operation with superior results.

The outer bowl is made of spun steel and the inner bowl of cast aluminum.

Equipped with 6" transport wheels, vacuum port for use with the dry vacuum and bottom dust skirt that contains dust during operation.
